WHOLESALE PRICE LIST

—OF THE—

VINLAND NURSERY

AND

FRUIT FARM.

[ESTABLISHED 1857.]

SITUATED TEN MILES SOUTH OF LAWRENCE, ON S. K. R. R., BRANCH OF A. T. & S. F. R. R.

SPRING OF 1894.

INDEXED

W. E. BARNES, Proprietor.

VINLAND, DOUGLAS CO., KAS.

CHOICE FRUITS IN THEIR SEASON.

JOURNAL PUBLISHING COMPANY,
LAWRENCE, KAS.

INDEXED

ANNOUNCEMENT.

The stock offered the present season is very fine, smooth, thrifty, and full size.

Terms invariably cash or satisfactory security before shipping.

Trees sent by railroad will be carefully packed, for which an additional charge will be made sufficient to cover cost of material.

Five hundred, fifty, and six will be furnished at the thousand, hundred, and dozen rates, respectively.

Money to be sent by Postal Order, by Draft or Registered Letter, or by Express. When sent otherwise we cannot be responsible.

Parties wishing theirs sent C. O. D. must send one-third the amount with order.

GUARANTEE.—While we exercise the greatest care to have every tree or plant true to name, and are ready, on proper proof, to replace anything sent out by us that may prove untrue to label, free of charge or refund the money paid for it, it is understood and agreed, between purchaser and ourselves, that we are not to be held liable for any greater sum than that paid us for said trees that prove untrue.

Catalpa, 8 to 10 feet	1 00	6 00
" 5 to 6 feet	....	3 00
" one year old	$2 50 per M.	
Chestnut, 4 to 5 feet, transplanted	2 50	20 00
Alanthus, 8 to 10 feet	1 50	.....
" 6 to 8 feet	1 50	.....
Russian Mulberry, 3 feet	75	.....
" " 1 year, 75c. per 100, $2 00 per 1000.		.....

WEEPING TREES.

	Each.		
Willow, Babylon, 6 to 7 feet	25c.	1 50	.....
" Kilmarnock 5 to 6 feet	40	3 50	.....
Weeping Ash, 5 to 6 feet	40	3 50	.....

EVERGREENS.

Two or Three Times Planted.

All of the following varieties succeed well here, if the ground is kept cultivated or mulched. In transplanting, we place the roots in boxes immediately, with plenty of earth to cover them; in this way there is but little danger of loss.

	Each.	Doz.
American Arbor Vitæ, 3½ to 4 feet	50c.	$4 00
" " 2 to 3 feet	30	2 00
Red Cedar, 3 to 4 feet	35	2 50
" 2 to 3 feet	25	1 50
" 18 to 24 inches	20	1 00
Hemlock, 2½ to 3 feet	40	3 00
" 2 feet	30	2 50
Scotch Pine, 2½ to 3 feet	35	2 00
" 18 to 24 inches	25	1 00
Austrian Pine, 18 to 24 inches	25	1 50
" 2½ to 3 feet	30	2 50
White Pine, 18 to 24 inches	25	2 00
" 3 to 5 feet	35	2 50
Norway Spruce, 3 to 4½ feet	40	3 00
" 18 to 24 inches	25	1 40
Irish Juniper, 2 to 3 feet	50	3 00
" 18 to 24 inches	40	2 50
Savin (Trailing Juniper), 2 to 3 feet	25	2 00

FLOWERING SHRUBS, ETC.

Althea, Flowering Almond, Golden Bell, Upright Honeysuckle, Lilacks (White, Purple, and Persian), Spireas, Syringa, Snowball, Japan Quince, Tamarix, Wegelia, Scarlet and Yellow Monthly, Cinnamon Scented and Chinese Evergreen Honeysuckles Trumpet Creeper, and Chinese Wistaria, 25 cents each; $2 per dozen; $12 per 100. Clematis ~~and~~ Jackmanii, 35 cents each.

ROSES.

	Each.	Doz.	100.
June varieties	25c.	$2 50	$12 00

White and Golden Willow, Lombardy Popular	25c.	1 50	.....

HEDGE PLANTS.

Osage Orange, one year	..	1 00	.....

Directions for Planting Trees.

Select high, dry ground for your orchard. NEVER plant on wet lands, though low ground will produce good fruit if well drained, or thrown into ridges, or lands with trees in the center.

Every State has varieties best adapted to its climate. A variety that is good for Massachusetts or Illinois may not succeed in Kansas; therefore, do not select a list of trees because they are favorites in the East.

Plow to the depth of ten or twelve inches; if deeper, all the better.

Lay off your orchard, if for apples, twenty-five to thirty-three feet each way; if for peaches or plums, sixteen to twenty feet; pears and cherries, twenty feet; quinces and dwarf fruit, eight to ten feet.

Cut smoothly all bruised roots; remove such top branches as are not needed for well formed trees; cut back one-half of last year's growth.

Never plant a tree when the ground is too wet to work well; rather "heel them in" until the ground is in a proper condition.

Make the holes large enough to admit ALL the roots without cramping, and fill in with mellow earth, adding one or two shovels full of WELL ROTTED manure. If the ground is very dry, water; then tramp the earth firmly.

Watering is VERY IMPORTANT, especially in central and western Kansas, Colorado and New Mexico.

The tree should always be planted a little deeper than it grew in the nursery.

For an apple orchard, would recommend low-headed trees, first limbs 2½ to 3 feet high; cultivate EVERY season until middle of July. (Corn is a good crop to grow in orchards while trees are very young.) Prune lightly; let the tops shade the bodies. If trees lean to north or east, crowd them back and place a few shovels full of earth against them to hold in position.

In Spring and Fall examine trees at the surface of the ground for borers, which will be detected by sawdust or boring; cut out with a sharp knife; wash the bodies early in May with strong soap-suds, to which should be added a quantity of sulphur. As a preventive of both rabbits and borers, a wash, composed of equal parts of pine-tar and spirits of turpentine, has been used with good success in this vicinity; to prevent borers it should extend a little below the surface of the ground.

W. E. BARNES,
Vinland, Kansas.
